SUMMARY

Computer science graduate who worked as the only data analyst in a finance team at WROGN. I gathered requirements from non-technical stakeholders, traced data discrepancies to their root cause, and built and maintained production Power BI dashboards covering 65 branches across 14 states. Seeking an entry-level Data Analyst or Business Analyst role.

EXPERIENCE

Data Analyst Intern, WROGN (Universal Sportsbiz Pvt. Ltd.) Bengaluru, India | Through Jul 2026

Sole data analyst for the finance department

- Was the single point of contact for finance reporting: led requirement conversations, scoped fixes and explained outcomes to non-technical stakeholders.
- Designed and maintained **4 production Power BI dashboards**: GST validation, state-wise sales trends, salesman performance across **65 branches and 14 states**, and NSV and tax audit.
- Investigated mismatches between SOH and Sales tables, ran root-cause analysis, and rebuilt table relationships and the data model to fix them.
- Moved reporting from static offline Excel files to a live Google Sheets source, and documented the FTP → OneDrive → Power BI pipeline so others can maintain it.
- Used Python (Pandas, NumPy) to clean data and test assumptions before findings reached stakeholders.
- Balanced competing requests from finance stakeholders to keep dashboard delivery on schedule.

PROJECTS

Independent projects on retail and fashion data.

The Souled Store: Retail BI Dashboard Power BI, DAX

- 3-page dashboard on 1,500+ orders, 150 products and 1,000+ inventory SKUs, with **35+ DAX measures** (sell-through %, dead stock value, gross margin %, cancellation rate) and channel-wise revenue for D2C, Amazon and Flipkart.

AI-Driven Inventory Optimization (final-year project) Python, Scikit-learn, Streamlit

- Random Forest demand forecasting model to flag overstock, understock and stockout risk. **RMSE 17.75**. Deployed as a live Streamlit app.

Bewakoof: Sales and Customer Dashboard Power BI, DAX

- 2-page dashboard on 3,000+ orders across 6 channels: **■2.64M revenue**, 56.14% repeat customers, 51.93% gross margin, franchise performance.

Also built: Zara vs H&M pricing analysis, Zepto sales analysis, startup investment analysis, retail profitability analysis (SQL, Excel, Power BI). See the portfolio for details.

SKILLS

BI and reporting	Power BI (DAX, Power Query, data modeling), KPI design, Excel (XLOOKUP, SUMIFS), Google Sheets
Data	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Scikit-learn, Streamlit
Business analysis	Requirements gathering, root-cause analysis, gap identification, process and data-flow documentation, stakeholder communication
Learning	Deeper SQL and applied statistics; Agile/Scrum and Jira fundamentals (self-study)

EDUCATION

B.E. Computer Science, Arasu Engineering College, Kumbakonam Graduated May 2026
CGPA 7.8
